*Increasing Capacity for
Pediatric Clinical Research*

Goals of PedsNet

1. Reducing immunization disparities and increasing immunization rates among minority patients
2. Increasing African American minority participation in clinical research

Acknowledgement

The NMA Pediatric Research Network (PedsNet) is supported by the American Academy of Pediatrics (AAP). The NMA PedsNet and AAP are jointly sponsored by the Health Resources and Services Administration Maternal and Child Health Bureau (HRSA MCHB) Federal Grant Number R60 MC00107. The contents of this communication are solely the responsibility of the authors and do not necessarily represent the official views of HRSA MCHB, Department of Health and Human Services, and the United States Government.

Overview of NMA & PedsNet

The National Medical Association (NMA) is the oldest and largest organization, representing the interest of more than 30,000 African American physicians. NMA PedsNet is the practiced-based Research Network of the Pediatric Section of NMA, directly responsible for increasing minority pediatric participation in clinical research.

How to Get Involved in NMA Pedsnet

Each physician should provide a full range of pediatric and/or adolescent primary care experience. The provider should have an active panel of patients for whom he/she is the primary care provider.

If you want to become involved in the effort to reduce health disparities through the NMA PedsNet Project, contact Cheryl Dukes at (202) 347-1895.

The medical literature is replete with clinical studies and recommended interventions for care and treatment of children and adolescents. These studies are frequently based on racially and economically skewed populations. Your participation can balance and diversify these study populations. The information generated by NMA PedsNet will have a positive impact on the health of this nation's children.
